## Insider Risk Management & User activity monitoring

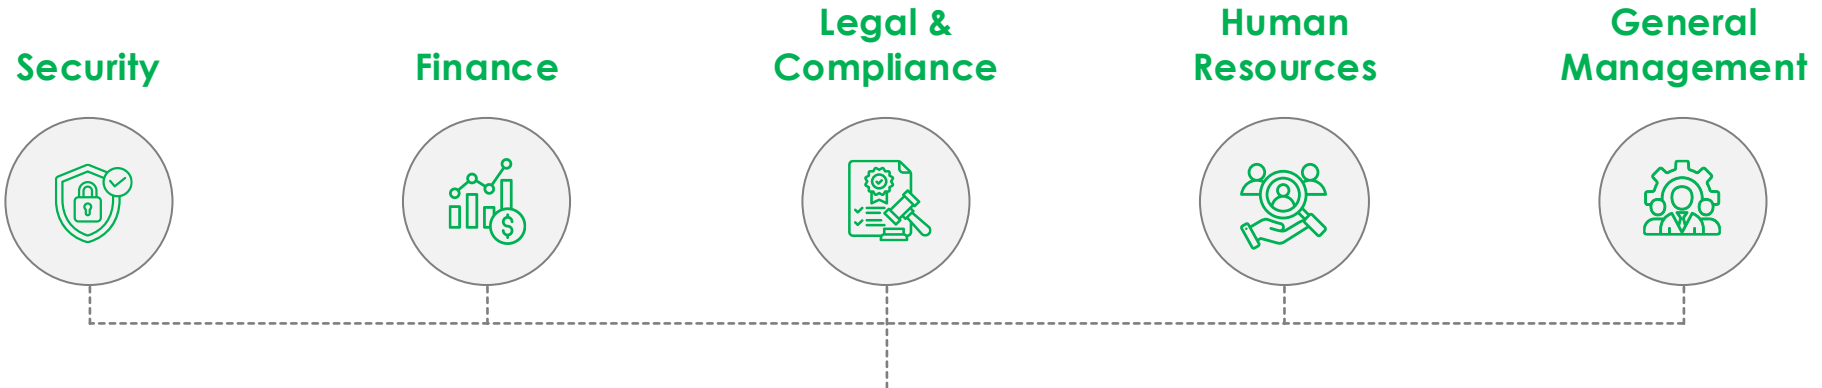

The Behavioral Visibility platform built to minimize risk and maximize productivity

# Veriato – 25 Years of Behavioral Visibility Innovation

# Cross-Functional Behavioral Risk Insights

Insider Risk Management  
**Maximize Effectiveness of Security Posture**

User Activity Monitoring  
**Elevate Workforce Effectiveness**

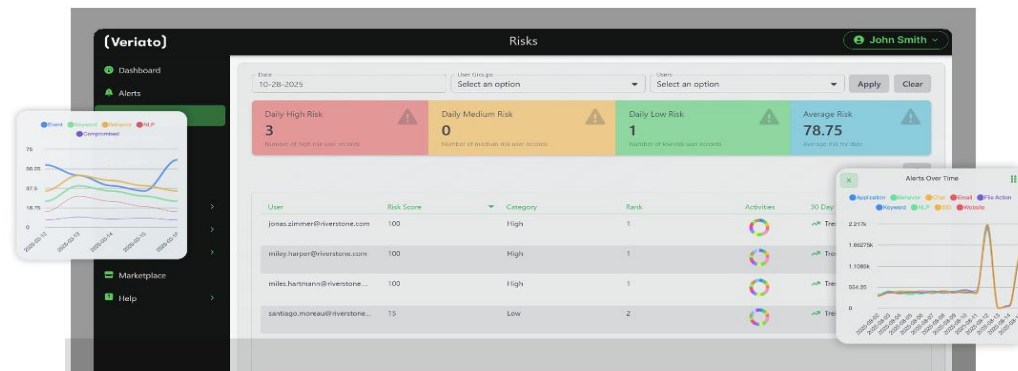

## Veriato IRM (Insider Risk Management) Behavioral Intelligence That Powers Risk and Performance

Veriato pioneered Insider Risk Management and leads in behavioral intelligence for early threat detection. From anomaly alerts to sentiment scoring, Veriato helps security and compliance teams detect and prevent insider threats before they escalate.

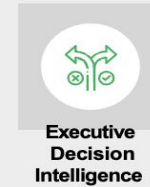

### Built to See What You Can't

Proactively detect behavioral risk and prevent insider threats before they escalate.

### One Platform. Many Use Cases.

## Key Features

Gen AI Risk Scoring based on 130+ data points (including emails, messaging, screenshots, files, documents, keystrokes, and more)

Unparalleled risk detection with fully configurable alerting and monitoring

Powerful anomaly detection from user baselines

Automatic PII CPHI identification with sensitive information redaction

Comprehensive language and sentiment analysis

Real-time data processing

Configurable, real-time data reports with flexible export capabilities

Security-focused with SSO and MFA

Flexible Deployment: Cloud or on-prem

Built for integrations with open, RESTful API

## Organization-wide Behavioral Intelligence

Security

Legal C Compliance

Finance

Human Resources

General Management

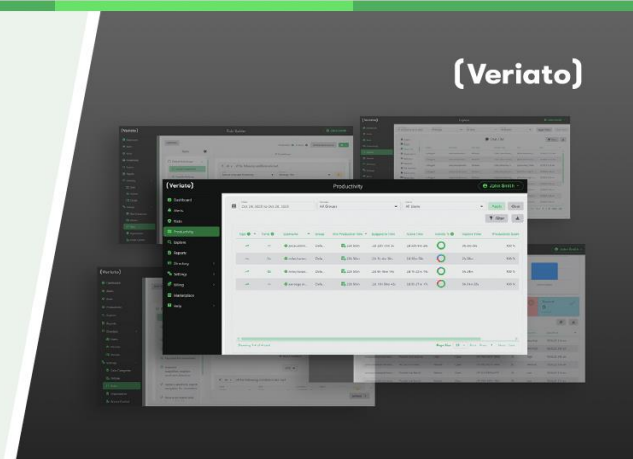

Infinitely Scalable | Lightning Fast | Fully Configurable

(Veriato)

## Veriato UAM (User Activity Monitoring) Operational Awareness in Real Time

Ethical, contextual, and configurable insight into human behavior.

Veriato empowers organizations with real-time insight into how work gets done. Through continuous behavioral baselining, our platform helps HR, ops, and leadership teams uncover inefficiencies, flag disengagement, and improve productivity—without surveillance.

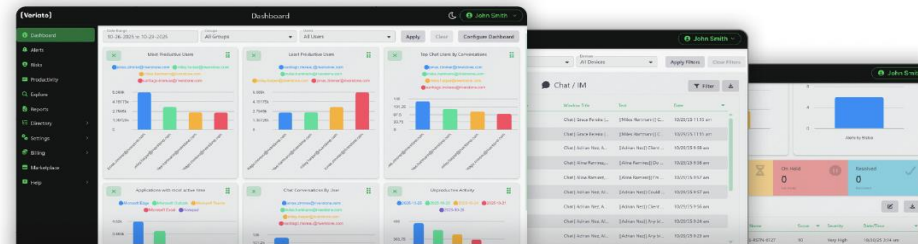

### Behavioral Visibility is Essential Business Intelligence

Veriato UAM provides real-time visibility into employee activity to support performance, compliance, and investigations.

#### Tracks 130+ Data Points in Real Time

Detects activity patterns, anomalies, and tracks performance

Alerts-based system enables proactive, data-informed action

### One Platform. Many Use Cases.

Workforce Visibility and  
Engagement Tracking

Legal and HR  
Investigations

Compliance and  
Policy Enforcement

Executive Decision  
Intelligence

Infinitely Scalable | Lightning Fast | Fully Configurable

(Veriato)

## Key Features

Capturing 130+ different data points, including screenshots, email, chat monitoring, website, and application use, documents, and file transfers

Real-time data processing

Fully customizable dashboards and settings

Configurable alerts

Customizable reports with flexible export options

AI-driven productivity scoring

Flexible deployment, both on-prem and cloud

Built for integrations with Open RESTful API

## Visibility Across the Enterprise

Legal & Compliance

Finance

Human Resources

General Management

# What You Can't See Can Hurt You. Address Internal Risk.

Accurate, actionable intelligence to strengthen your security posture and close the visibility gap

# Business Value at Every Layer of the Organization

## User Activity Monitoring

- Increased Workforce Productivity
- Regulatory Compliance & Audit Readiness
- Transparent Investigations
- Visibility Across Remote & Hybrid Workforces
- Early Detection of Burnout & Disengagement

## Insider Risk Management

- Proactive Insider Threat Detection
- Reduced Investigation and Response Times
- Operational and Strategic Decision Support
- Stronger Compliance & Government Posture
- Lowered Risk of Costly Security Incidents

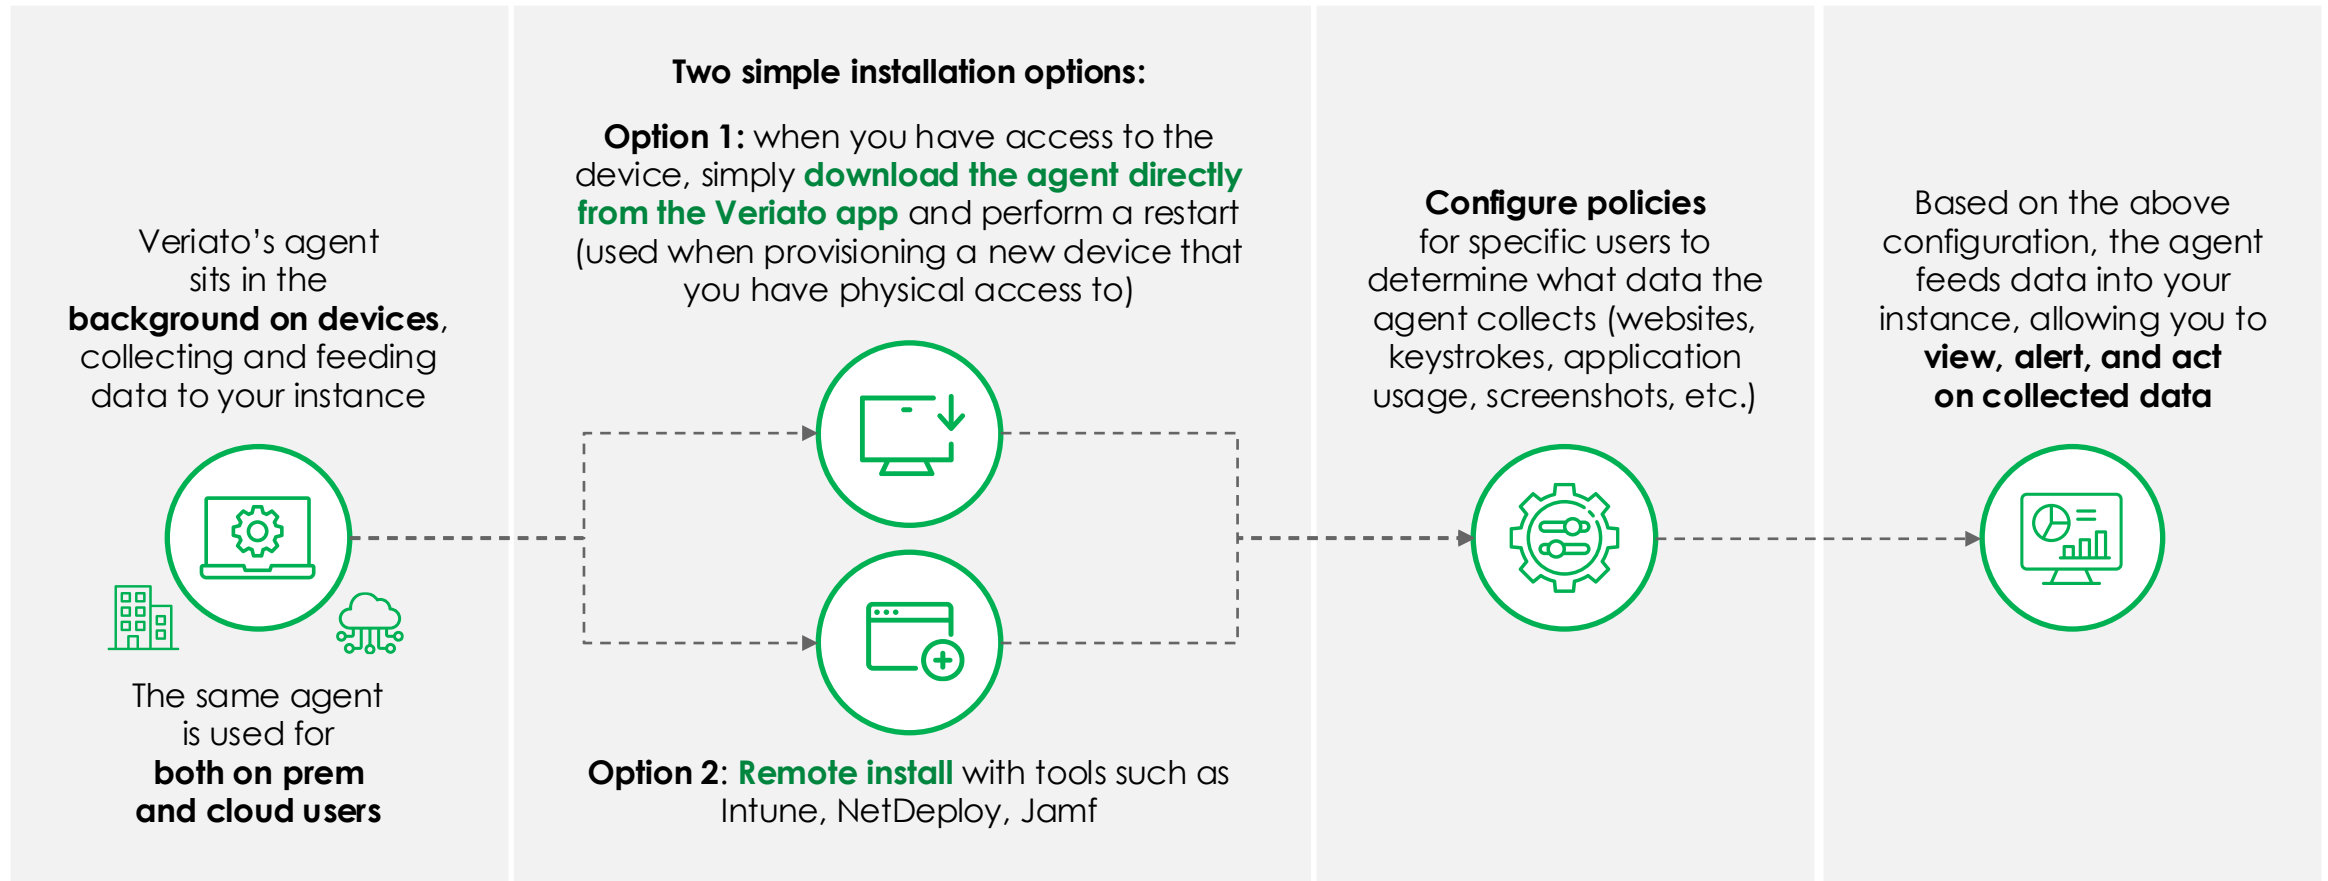

# Feature List

	UAM	IRM
Best in class telemetry data collection	●	●
All data types (email, chat, websites, applications, screenshots, login/log off, idle time, files and documents, network, keystrokes)	●	●
Productivity Scoring	●	●
Configurable reports and dashboards	●	●
Unlimited alerting configuration and management	●	●
Flexible recording policies	●	●
Sensitive Data Detection and Redaction	●	●
Website Blocking/Redaction/Do Not Record	●	●
O365 Integration	●	●
Open, RESTful API	●	●
Holistic Action Audit Log	●	●
Risk Management Dashboard with Actionable Insights		●
Insider Risk Scoring at User and Group Level		●
User Behavior Baselineing		●
Fully Configurable Risk and Behavior Insights		●
Natural Language Processing: Sentiment Analysis		●

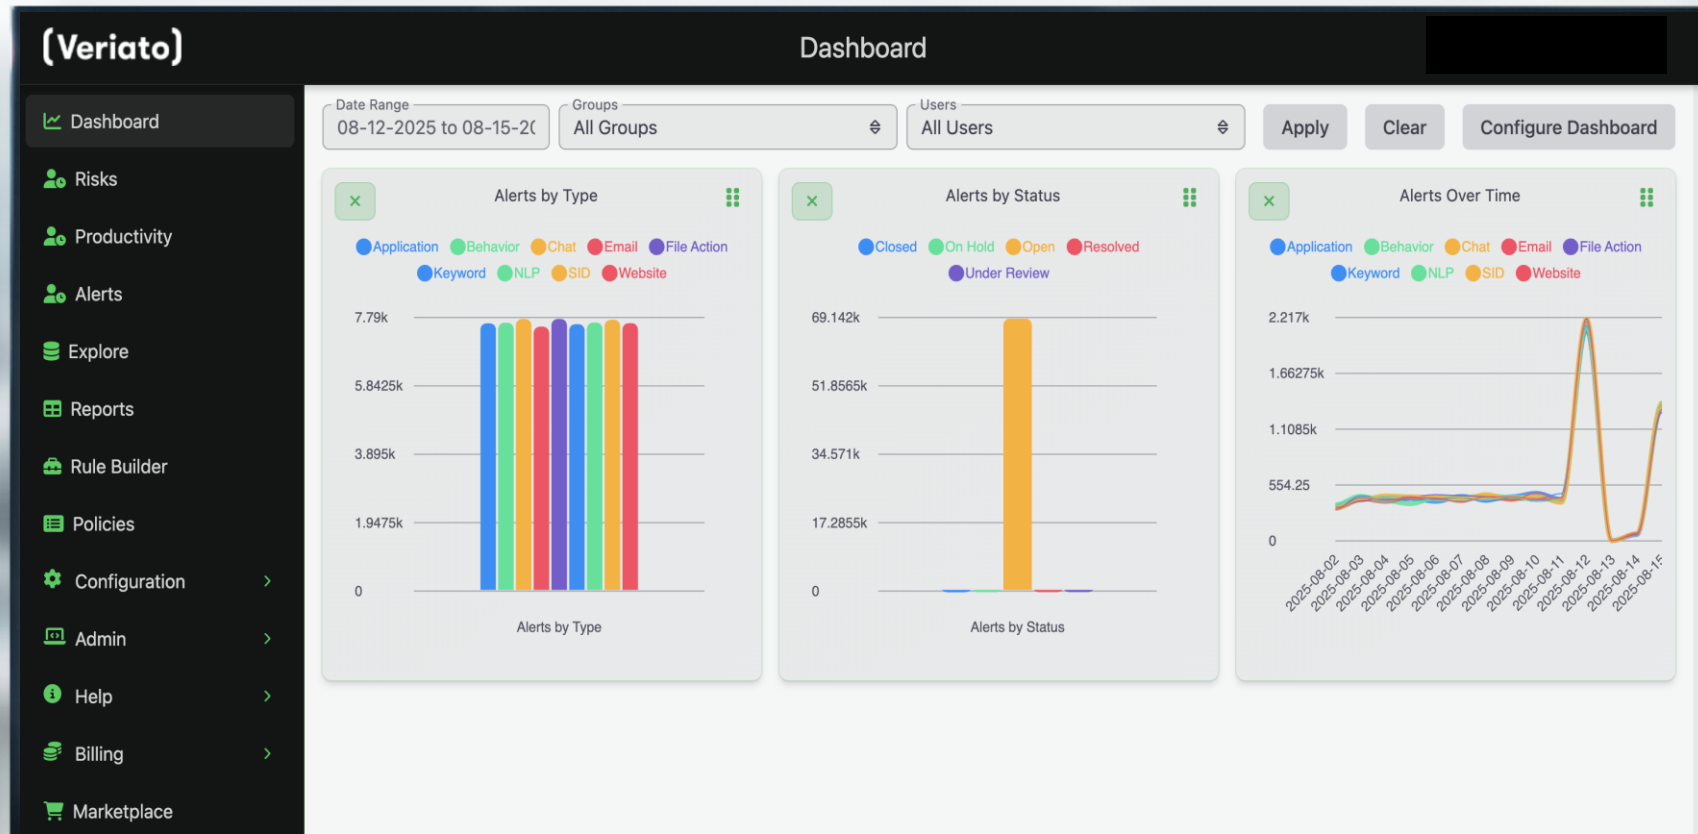

# Invisible Deployment. Powerful Insight.

Veriato's industry leading agent collects every data point you need, with easy setup

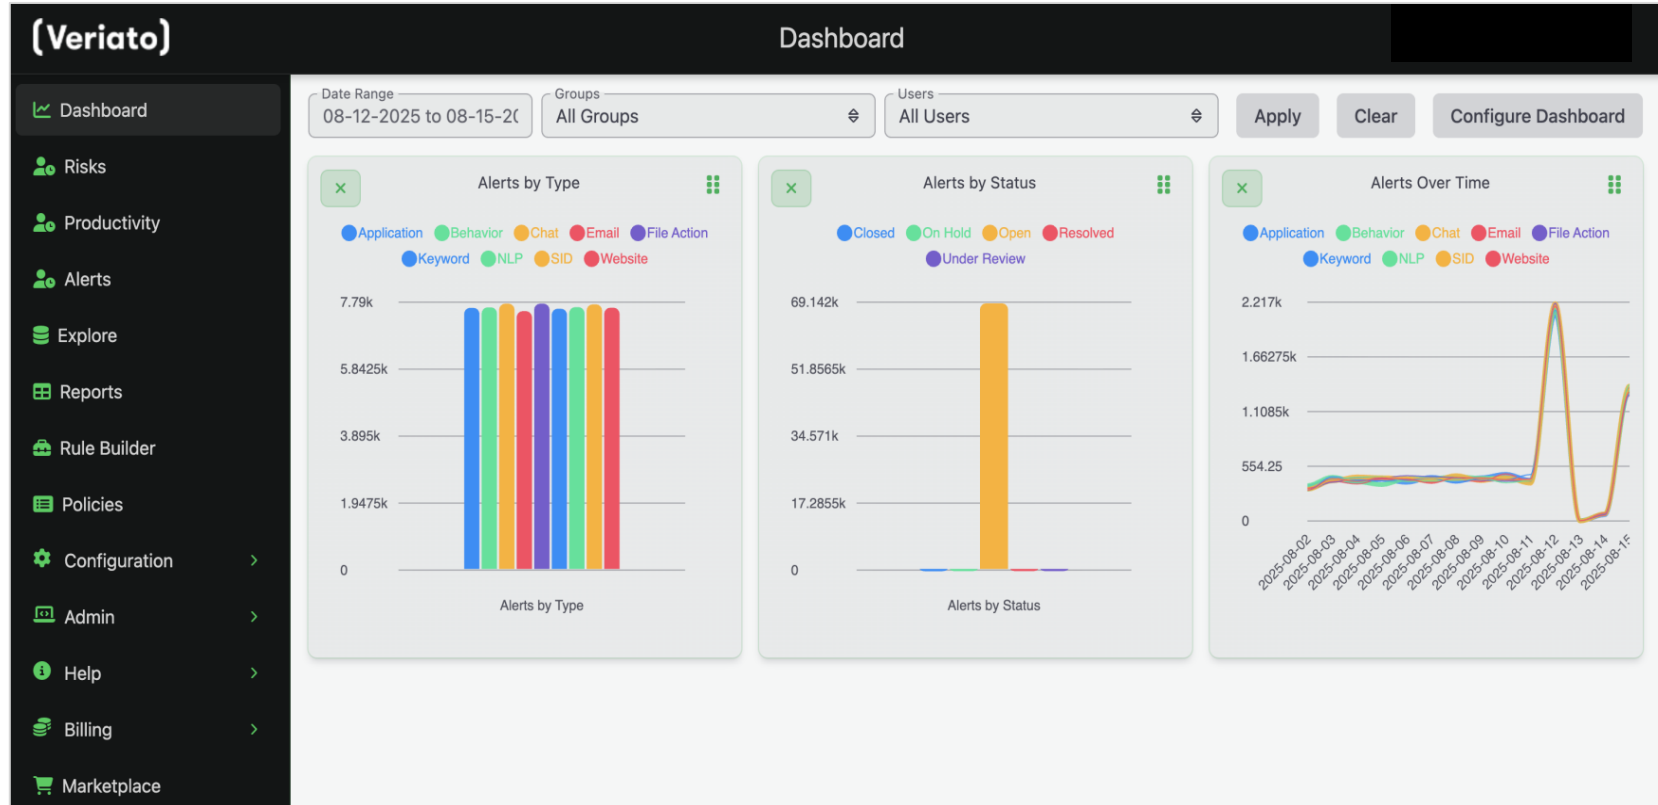

# Intuitive & Customizable UI

## Streamlined workflows & fully customizable dashboard

# Customize your organization's dashboard

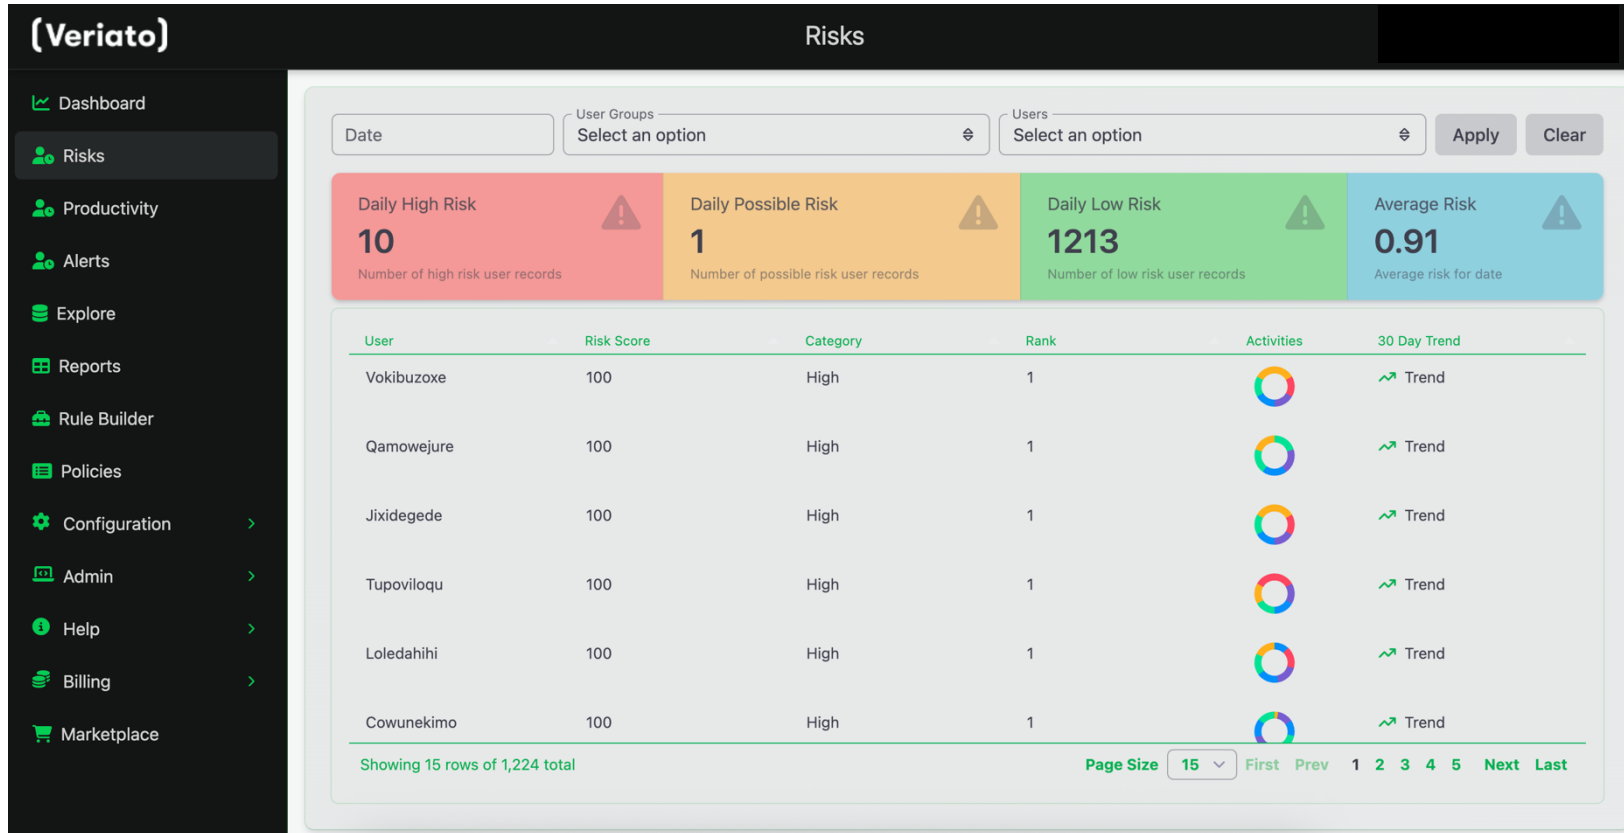

Tailor by role, multiple views

Elevate and visualize data based on KPIs or role.

# Behavior Dashboard Showcases Risk per User

Easy to navigate, isolate highest risk users, drill down

  
Operate with real-time data. Escalated risk at-a-glance.

# Uncover Trends. Prioritize Action.

Easily analyze trend information

# Real-time data reports with flexible export capabilities

Immediate, scheduled, or ad-hoc exports configured how (and when) you need them

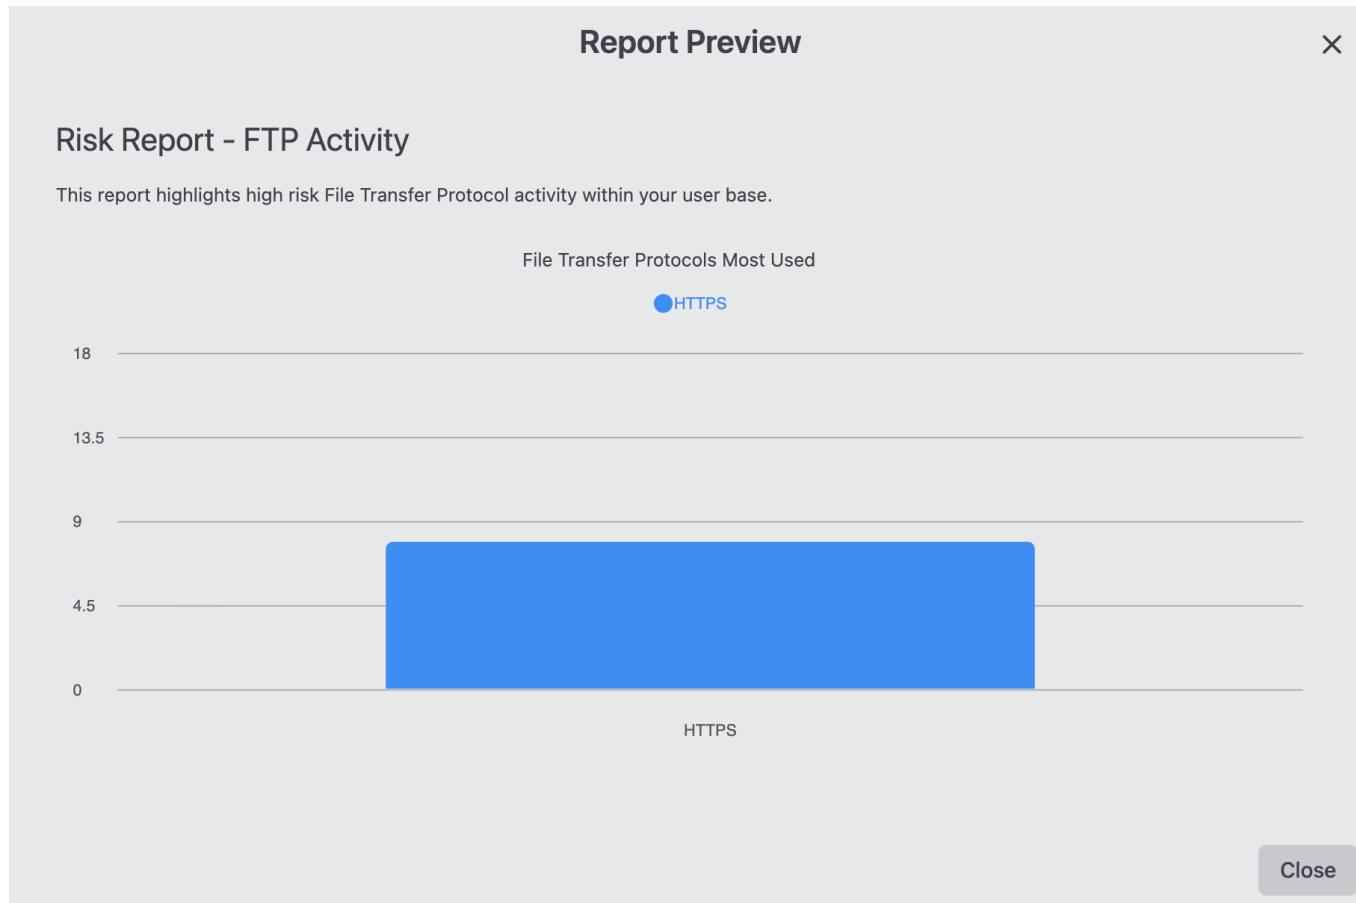

The screenshot displays the Veriato Reports interface. On the left is a dark sidebar with navigation items: Dashboard, Risks, Productivity, Alerts, Explore, Reports, Rule Builder, Policies, Configuration, Admin, Help, Billing, and Marketplace. The main content area is titled 'Reports' and has tabs for 'My Reports' and 'Public Reports'. Below the tabs are buttons for 'New Report' and 'Schedule New Public Report'. A 'Filter' button is located on the right. The main area contains a table with the following data:

Report Name	Report Description	Report Category	Created Date	Last Modified Date
Alert Public Report	Alert Public Report	Alerts	8/5/25 9:04 am	8/5/25 9:04 am
website summary for speci...	list domains and times visit...	Websites	8/8/25 4:27 pm	8/8/25 4:27 pm

At the bottom of the table area, it says 'Showing 2 rows of 2 total' and includes pagination controls: 'Page Size 25', 'First', 'Prev', '1', 'Next', and 'Last'.

# Reporting & Alerting: Significant Insights Available

Expanded data sets – including metadata on keystrokes & more

Increased data to provide deep, actionable insights.

# Fully configurable alerting and monitoring

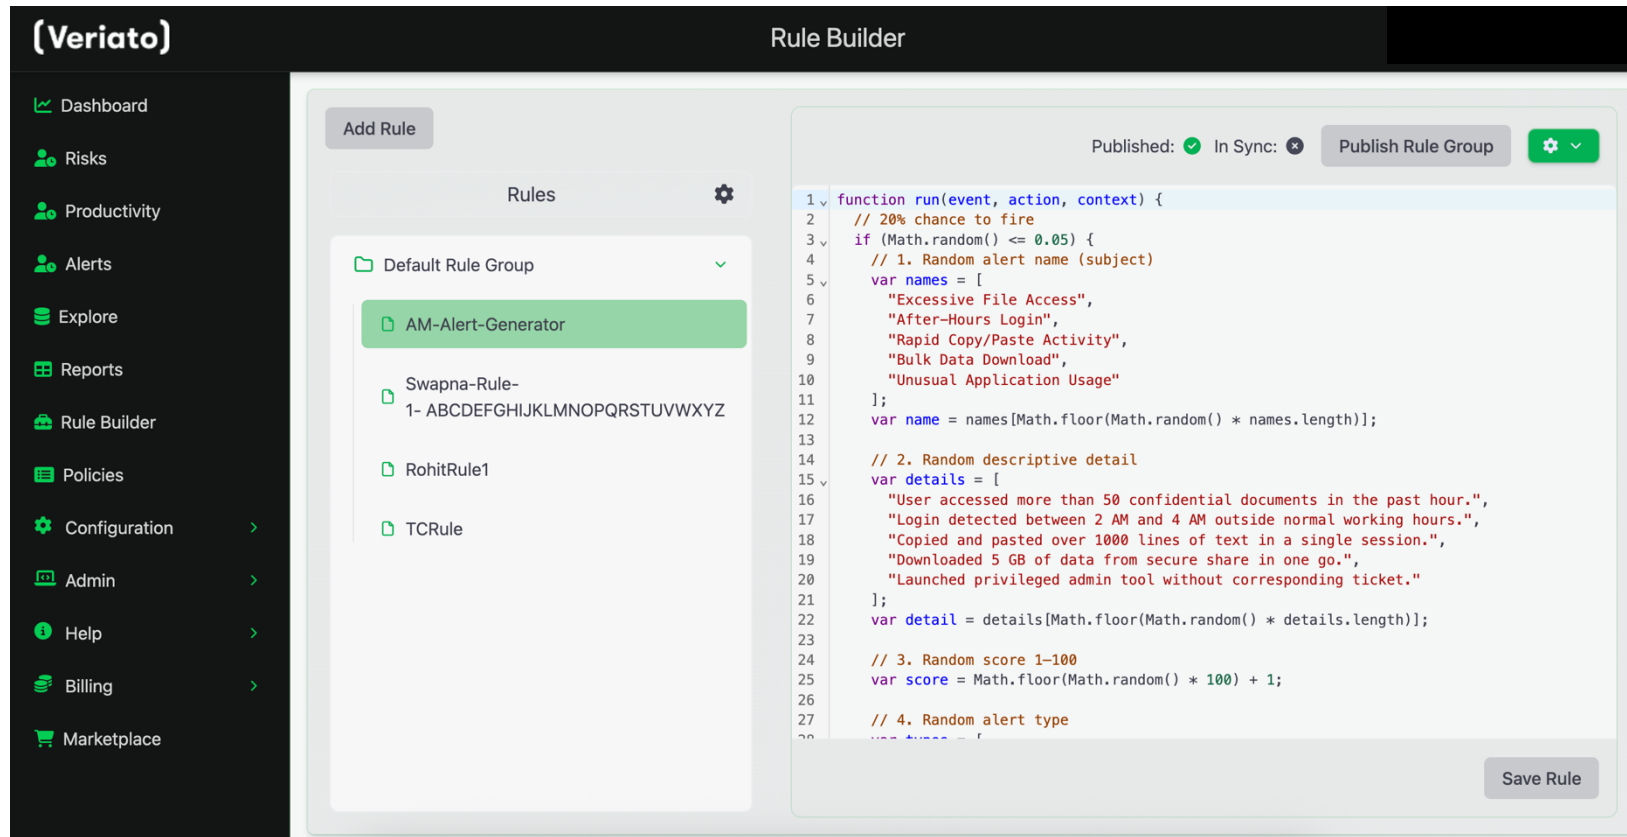

Flexible rule builder engine allows for proactive alerting to every necessary use case

The screenshot displays the Veriato Rule Builder interface. On the left is a dark sidebar menu with the Veriato logo and navigation items: Dashboard, Risks, Productivity, Alerts, Explore, Reports, Rule Builder, Policies, Configuration, Admin, Help, Billing, and Marketplace. The main area is titled 'Rule Builder' and contains an 'Add Rule' button, a 'Rules' list, and a configuration panel. The 'Rules' list shows a 'Default Rule Group' containing 'AM-Alert-Generator', 'Swapna-Rule-1- ABCDEFGHIJKLMNOPQRSTUVWXYZ', 'RohitRule1', and 'TCRule'. The configuration panel shows 'Published: ✓ In Sync: ✗' and a 'Publish Rule Group' button. Below this is the 'If Conditions' section with a dropdown set to 'All' and the text 'of the following conditions are met:'. A single condition is configured: Field 'Application', Field 'Product Name', Condition 'Contains', and Value\* 'Outlook'. There are '+ Add Condition' and '+ Add Block' buttons. An 'Actions >' button is at the bottom right.

  
**Nearly unlimited  
configuration options for  
generating rules  
and alerts**

# Rule Builder – The Code Behind the Configuration

Use your technical assets to create rules using code

The screenshot displays the Veriato Rule Builder interface. On the left is a navigation sidebar with options like Dashboard, Risks, Productivity, Alerts, Explore, Reports, Rule Builder, Policies, Configuration, Admin, Help, Billing, and Marketplace. The main area is titled 'Rule Builder' and contains a 'Rules' list on the left with items like 'AM-Alert-Generator', 'Swapna-Rule-1- ABCDEFGHIJKLMNOPQRSTUVWXYZ', 'RohitRule1', and 'TCRule'. The central part is a code editor showing a JavaScript function:

```
1 function run(event, action, context) {
2   // 20% chance to fire
3   if (Math.random() <= 0.05) {
4     // 1. Random alert name (subject)
5     var names = [
6       "Excessive File Access",
7       "After-Hours Login",
8       "Rapid Copy/Paste Activity",
9       "Bulk Data Download",
10      "Unusual Application Usage"
11    ];
12    var name = names[Math.floor(Math.random() * names.length)];
13
14    // 2. Random descriptive detail
15    var details = [
16      "User accessed more than 50 confidential documents in the past hour.",
17      "Login detected between 2 AM and 4 AM outside normal working hours.",
18      "Copied and pasted over 1000 lines of text in a single session.",
19      "Downloaded 5 GB of data from secure share in one go.",
20      "Launched privileged admin tool without corresponding ticket."
21    ];
22    var detail = details[Math.floor(Math.random() * details.length)];
23
24    // 3. Random score 1-100
25    var score = Math.floor(Math.random() * 100) + 1;
26
27    // 4. Random alert type
28    var type = [
```

At the top right of the code editor, there are status indicators: 'Published: ✓', 'In Sync: ✗', and a 'Publish Rule Group' button. A 'Save Rule' button is located at the bottom right of the code editor.

Nearly unlimited  
configuration options for  
generating rules  
and alerts

# AI-driven sentiment analysis and data redaction

Understand intent. Protect data. Automatically.

Regarding Case 900-12-3456 a part of 4111111111111112

Hello,

This is a test that contains a social security number of 223-45-9162 and something that may or may not be a bank account number 0032338329. This information should be considered confidential or even classified as top secret.

My patient's name is Harrison Ford. He was born on 7/13/1942 and his passport number is 356742981. I show that his credit card number is 5200 8282 8282 8210

I will have you contact my CEO, Elizabeth Harz for additional information

Regarding Case 900-12-3456 a part of 4111111111111112

Hello,

This is a test that contains a social security number of ██████████ and something that may or may not be a bank account number ██████████. This information should be considered confidential or even classified as top secret.

My ██████████ is ██████████. He was born on ██████████ and his passport number is ██████████. I show that his credit card number is ██████████.

I will have you contact my CEO, Elizabeth Harz for additional information

# NLP: Uncover risk in everyday communications

## Deep understanding of unstructured data

### NLP

- Extensive NLP capability to identify potential risks like fraud, sensitive content, or malicious intent in emails, chats, and keystrokes.
- Real-time detection using sentiment analysis and language processing to proactively surface insider threats.

```
{
  "text": "That's so stupid! Only an idiot
would think that's a good idea.",
  "language": "en",
  "results": {
    "sentiment": {
      "negative": 99.97
    },
